

feel it from here

when the sun won't shine
all your jokes make you cry
so uneasy
don't touch your telephone
the answer's right at home
free and easy
raise your hand up
touch your heart
every beat is a brand new start
feel it from here
don't look back now
if you want to feel what is real
then you gotta be true

feel it from here
can't go back now

tell me would you or me
really like to be
president
good people throw their stones
and then lock up their homes
so content
raise your voice up
with your heart
every word is a brand new start
feel it from here
don't look back now
if you want your words to ring through
then you gotta be true
feel it from here
can't go back now

what is your heart's desire
what really lights your fire
see it clearly
people will shoot their darts
you got to live your heart
hold it dearly
close your eyes now
see your heart
every beat is a brand new start
feel it from here
don't look back now
if you want to see what is real
then you gotta be true
feel it from here
can't go back now

and on your final day
with nothing more to say
you're out of breath
you know you still live on
though now your body's gone

let it rest
raise your heart up with your soul
one more beat now
off you go

feel it from here
don't look back now
if you want to feel what is real
then you gotta be true
feel it from here
can't go back now
